Professional Web Developer

Jan 2014

Devnet Solution Provider

Domain Driven Design Architecture

July 2016

Myanmar Region Computer Professionals Associations

Database Administration

August 2019

Gesto College

Work Experience

YTL PowerSeraya - Singapore

Dec 2022 - Current

Software Engineer

- Customisation for Oracle Utility software - CCNB
- Support and cooperate with GENECO business users related with billing, credit control and batch processing using Java and .NET

Myanma Apex Bank

Jan 2021 - Dec 2022

Senior Software Engineer

- Develop in-house projects using Flutter, Angular, Java, .NET, Oracle Database, and WebLogic Server
- Collaborate with other development teams

✓ Expertize

- Desktop, Web and Mobile Development
- Database Management
- Data Centralization and Migration
- Replication and Mirroring
- Docker
- Shell scripting
- Power BI
- Azure Cloud
- ERP and Retail
- Git, TFS and VSS
- Crystal Report
- Photoshop

★ Completed Projects

Customer Care and Billing - YTL PowerSeraya (Singapore)

This is an Oracle Utility software for a customer care and billing system for traditional scalar devices and billing processes. It is designed for utilities of all sizes, supports one to many utility service types, and handles the complexities associated with a utility's business processes.

- Customisation, adding new features and bugs fixing
- Batch monitoring and processing
- Integrate with Geneco Tech's system

Language: Java (OUAF), .NET 6

Human Resources Application (INTERCOMM) - MAB

This is an ongoing enterprise application to improve our internal business needs

- Making announcements, members and groups management
- Knowledge sharing of banking services to improve skills with training videos and documents
- Payroll, Pay slip, check-in and check-out are up coming features

Language: Flutter, Java(Spring Boot) & Angular 8, Firebase

App Link: [MAB INTERCOMM](#)

Threshold Transactions Report - MAB

Send detailed information of transactions over a specific amount to the Central Bank of Myanmar

- Extract data from core banking system and transform it according to CBM requirements
- Send PGP encrypted zip file via Email

Language: .NET 6 & Angular 8

Merchant Payment Integration - MAB

Payment integration between merchants and OBDX (Oracle Banking Digital Experience)

- Communicate with merchants to be able to make payment via website or inside the app

Language: Java(Spring Boot, JPA) & Angular 8

Work Experience

Myanmar Information Technology

Nov 2016 - Dec 2020

Software Engineer

- Handle and support reliable solutions through innovative technologies for large local retail systems and ERP.
- Provide business insight, and sales forecasting using Azure, Power BI, and Power Apps.

System Gear Myanmar

Apr 2015 - Sep 2016

Software Developer

- Develop a transportation management system and cheque issuing system.
- Problem-solving, customization, and reporting.

Devnet Solution Provider

Jan 2014 - Mar 2015

Software Developer

- Develop ERP, POS, and website using ASP.Net and .Net.

★ Completed Projects

Other projects - MAB

Question & Answer System

- A system like 'Google Form' to test the skills and knowledge of staff

eDocument System

- Converting loan contracts to electronic documents using the system to store, search, retrieve and centralize all from branches.

OBDX UI Branding

- Customize the whole application theme according to the UI/UX department's requirements in OBDX (Oracle Banking Digital Experience)

CMHL BI Solution - MIT

CMHL wants all the City Marts, Oceans, and Seasons retail data to combine and do business insights

- Creating a centralized data server and data sync service to sync data from all branches every night.
- Creating ETL processes to improve performance and speed of loading Power BI reports.
- Scheduling the ETL processes for day-to-day upcoming transactions using SQL Agent Jobs.
- Creating Power BI reports according to the requirements.

Tools: MSSQL Integration Service (SSIS), Azure Cloud Services and Power BI

Microsoft Dynamic 365 CRM Integration with Power BI - MIT

Integration between D365, Azure, and Power BI services to make business insights

- Connect D365 to pull all the data and store it in our Azure SQL database using SSIS packages.
- Creating ETL processes to improve performance and speed of loading Power BI reports.
- Scheduling the ETL processes for day-to-day upcoming transactions using Azure Data Factory.
- Creating Power BI reports according to the requirements.

Tools: MSSQL Integration Service (SSIS), Azure Cloud Services, and Power BI

ERP - MIT (Enterprise Resource Planning)

Customized ERP system developed by MIT which is the integrated management of core business processes to collect, store, manage data and track down business resources

- Add customized features and reports to sales order processing, purchase order processing, inventory, and data transfer (Between Head Office and Branch)
- Also support customer services and gather requirements

Language: C#, ASP.NET (REST)

POS and Data Centralization - MIT

- Add features, bugs fix, reporting to existing POS
- Changing to centralize system in 2018 – Data Migration
- Opening new branches - setup POS and server configuration
- Auto sales data uploading
- Auto generate sales reports of all branches

Language: C#, ASP.NET (REST)

Transportation Management System - System Gear Myanmar

System for managing transportation companies that take responsibility for shipping goods and cargo to the ordered location. Managing orders, payments, and expenses.

Language: C# WinForm with DevExpress

★ Completed Projects

Cheque Issuing System - System Gear Myanmar

Reading and writing information to and from cheques to perform various banking functions. It can be configured to print the whole MICR line with specific company details such as company name, branch code, account number, and bank name.

Language: C# WinForm with DevExpress

Finance - Devnet

Small application software that records and processes accounting transactions within functional modules such as accounts payable, accounts receivable, and general ledger referenced to MYOB.

- Sales orders & invoicing
- Purchase orders
- General Ledger

Language: C# WinForm with DevExpress

E-Learning System - Devnet

A system for students to self-learn by watching lesson videos without lecturers.

- Records students' attendances and tests results
- Improvement graphs of students for each course

Language: ASP.NET MVC with DevExpress

Gem & Jewelry - Devnet

A website to promote special items and let customers check available stocks and make orders online

- POS
- Reports by month, year, customer, product, etc.
- Alert to refill inventory
- Discount based on VVIP/VIP/Standard card or promotion day

Language: ASP.NET MVC with DevExpress

Portfolio

Created my responsive portfolio website and publish it at [github.io](#) to show evidence of the work and experience that I have done.

Language: Dart (Flutter)

Link: [Portfolio](#)

Additional Info

- Flexible person with good interpersonal communication skills and technical skills.
- Fast learner and love to cooperate with internal teams and external members.
- Strong analytical skills and problem-solving skills.
- Ability to meet deadlines and manage multiple projects.
- Always willing to learn new things.

Reason for leaving current job

Seeking a dynamic work environment where I can contribute my development skills, broaden my experience, and fuel my professional growth

Available/Notice Period: 2 months
